GeoComply

Company Overview

Since our inception in 2011, GeoComply's goal has always been to make the internet a safer place.

Our highly advanced compliance and anti-fraud solutions bring clarity to your digital ecosystem and all suspicious activity, giving you the assurance you're always one step ahead of fraud. And while fighting internet fraud is an intricate business, using GeoComply isn't.

Today, we have expanded our operations into diverse markets to serve any industry that requires effective geolocation for anti-fraud solutions, including financial services and cryptocurrency, media and entertainment, child protection, and more. Fraud moves quick. But GeoComply will always move quicker.

GeoGuard

Industry leading VPN & Proxy detection with 99.6% accuracy

GeoComply's GeoGuard™ solution provides multi-layered protection against malicious spoofing tools and techniques.

GeoGuard™ is a dynamic database of IP addresses that have been compromised VPNs, proxies, Tor exit nodes, residential proxies, and other types of IP address manipulation.

Advanced VPN and proxy detection helps to streamline investigations, map offender location and provide insights into the types of tools being used to manipulate an IP address.

Easy to implement

Available as a locally hosted, downloadable database (MMDB or CSV) or via API.

Historical data

Access historical builds of the database to investigate IP anonymizers at the time of investigation.

Defends against sophisticated spoofing techniques

Our team of experts is constantly refining the database to counter the latest IP fraud trends, including residential proxies and IPv6 anonymizers.
